## ASES' National Solar Conference

The National Solar Energy Conference is the premier technical conference for solar energy and energy efficiency professionals in the U.S. In its 38<sup>th</sup> year, this industry-leading conference series offers you:

- emerging trends, technological breakthroughs, industry insight, and connections you need to stay ahead.
- premiere technical conference, plenary and forum sessions exploring both the conference theme and the most timely topics of the day.
- industry leaders, innovators, and exhibitors who are shaping the industry.
- Renewable Energy Products and Services exhibit, showcasing manufacturers, dealers, distributors, installers and other related businesses and services.
- workshops, tours and special events of interest to professionals and consumers.

The conference theme, "You Have the Power!" refers to the power of individuals, groups and government to use renewable energy to solve many critical problems facing our world today. **Renewable energy can truly be a transformative force, especially when employed by people dedicated to making a difference and improving the world around them.**

At SOLAR 2009, we will bring together experts with the latest information on energy efficiency and the most inclusive range of renewable energy technologies, providing attendees with the opportunity to learn, compare notes and make connections.

## Buffalo, NY

Buffalo will be in full spring bloom at conference time, and will surprise you with its beauty and attractions. Architecture buffs love Buffalo, as its streets feature masterworks by some of the country's most revered architects, and one of the finest collections of late 19<sup>th</sup> and 20<sup>th</sup> century homes found anywhere. Most visitors are astounded to find National Historic Landmarks by the likes of **Frank Lloyd Wright, Louis Sullivan** and **H.H. Richardson**. They are blown away by one of the great collections of modern and contemporary art in the world at the Albright-Knox Art Gallery, delighted by the birthplace of Buffalo Wings at the legendary Anchor Bar, amazed by the home of the **American Arts & Crafts Movement** at the **Roycroft Campus**, and captivated by the 19<sup>th</sup> century mansions lining **Frederick Law Olmsted** parks and parkways. Nearby Niagara Falls provides the opportunity to experience the beauty, power (renewable energy!) and history of this natural wonder, where one-fifth of the world's fresh water comes crashing down thirteen stories. You can also easily visit our neighbors to the north — Canada is just over the bridge.

### Organized by:

American Solar Energy Society

### With support from:

New York State Energy Research and Development Authority  
Western New York Sustainable Energy Association Trust

## SOLAR 2009 will feature the

38<sup>th</sup> ASES National Solar Energy Conference  
34<sup>th</sup> National Passive Solar Energy Conference  
4<sup>th</sup> ASES Policy and Marketing Conference  
Renewable Energy Products and Services Exhibition
